

Made for life

How to specify guide

Lockin

Designed around your project

Lockin lockers are manufactured to order and configured around the needs of each project — from dimensions and materials through to layouts, locking systems and accessories.

Flexible dimensions & layouts

Locker widths, heights, depths and internal configurations can all be adjusted to suit project requirements, available space and user needs.

Material & finish flexibility

Available in laminate, steel or hybrid constructions, with commercial finishes including timber-look laminates, powdercoat colours, perforations and custom graphics.

Integrated lock & accessory systems

Locker systems can be configured with mechanical, digital, RFID or hardwired locking systems, alongside accessories such as seating, charging, mail slots, ironing stations and drying facilities.

Built for project-specific applications

From workplace and education environments through to elite sport facilities and custom operational requirements, Lockin systems can be adapted to suit unique project briefs.

Locker planning insights

Common locker planning considerations
that will help prevent operational, maintenance and user-experience issues later

Design lockers inside-out

Workplace lockers are only effective if daily items fit comfortably inside. Bag sizes, garments, helmets and personal equipment should inform locker dimensions before locker grids are finalised.

Shared vs. allocated use

Lock systems and locker layouts should align with how the workplace operates, including shared, allocated or hybrid-use environments.

Wet-area durability

Materials, ventilation and hardware selections should reflect moisture exposure, cleaning regimes and long-term durability within wet end-of-trip environments.

Durability & maintenance

Education environments create high-frequency daily use. Materials, hardware, hinges, ventilation, tops and finishes should all reflect long-term durability, ease of use and maintenance requirements.

How to specify

Lockin lockers are manufactured to order and configured around the needs of each project – from dimensions and materials through to layouts, locking systems and accessories.

1

Select locker system

Shelving, hanging or combined locker configurations to suit user storage needs.

2

Confirm dimensions & configuration

Locker widths, heights, depths and internal configurations can all be adjusted to suit project requirements.

3

Select materials & finishes

Available in laminate, steel or hybrid constructions, with commercial finishes including timber-look laminates, powdercoat colours, perforations and custom graphics.

4

Select lock system & customisations

Locker systems can be configured with mechanical, digital, RFID or hardwired locking systems.

Customisations and accessories such as seating, charging, mail slots, ironing stations and drying facilities.

Your specification to us should include: project location; locker type/configuration; quantities; dimensions; materials/finishes; lock requirements; accessibility requirements; customisations/accessories; programme.

Where available, please also share an FF&E schedule, floor plan or relevant project drawings.

Specification examples

	Laminate locker	Premium Steel locker
Locker & quantity	312 locker compartments / 78 × H4 four-tier locker units - Includes 16 x integrated ALH4 accessible locker compartments	288 locker compartments / 144 × CS2 two-tier locker units
Dimensions	2100 H x 400 W x 500 D mm	2100 H x 400 W x 550 D mm
Materials & finishes	Body: E0 white HMR particle board Doors: Laminex Nullarbor Drift	Powdercoat - Dulux Pale Eucalypt Matt Perforation pattern - Raindrops Echo Panel inserts - Cream 908
Lock systems	Digilock Aspire Digital Lock with pull handle	Keyless1 Mechanical Lock - Black
Customisations	USB Charging 120 H mm plinth to match skirting	Additional internal device shelf, USB charging Locker depth amended to 550 D mm
Project	ADX Fit-out, Cremorne VIC Delivery & installation - October 20-24	Black Systems P/L, Docklands VIC Delivery & installation - March 10-13

Built on experience

Proven delivery at scale

Since 2013

Specialising in lockers since 2013.

Focused, experienced and consistent.

731 locker projects

We've designed, manufactured and installed over 731 locker projects.

As at June 2026

3,952 lockers

Largest single project.

3,952 custom shelving lockers
Transport for NSW
