

Finishes: Patterns

Geometric

Overview

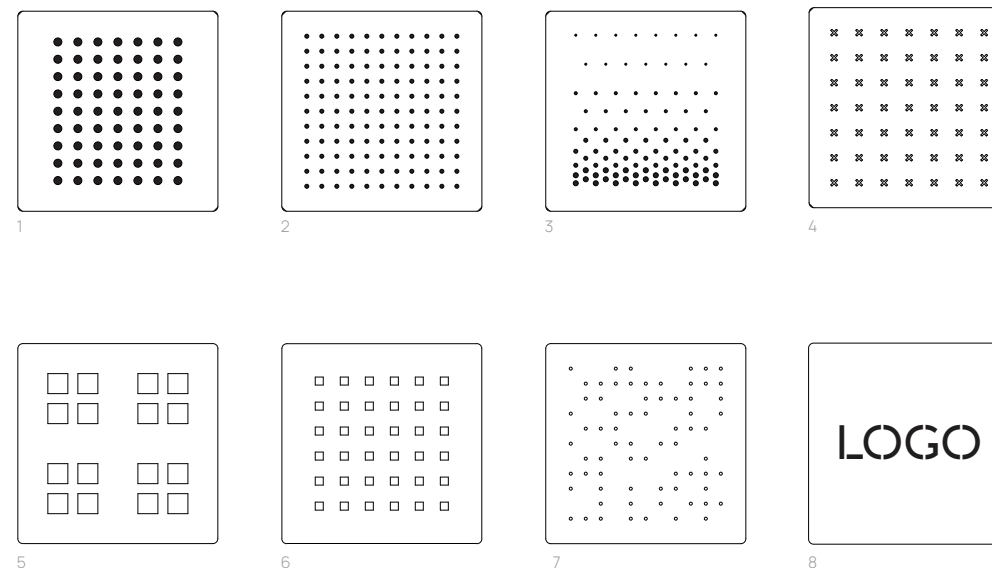

Lockin geometric perforation patterns provide a range of repeatable graphic treatments for premium steel locker doors.

Patterns can be applied across individual doors or wider locker elevations, with scale and spacing adjusted to suit the selected locker configuration and manufacturing requirements.

Most specified patterns

Key

1	Buttons (L)	5	Cubism
2	Buttons (S)	6	Gridlock
3	Champagne	7	Raindrops
4	Criss-Cross	8	Custom graphic (laser-cut stencil)
Other patterns available			

Finishes: Patterns

Lockin

Pattern scaling

Pattern scale, spacing and positioning can be adjusted to suit different door dimensions and locker configurations while maintaining the intended visual character of the selected pattern.

Project considerations

Individual doors

Patterns may be resolved within the boundaries of each locker door.

Acoustic backing & contrast

EchoPanel can be fitted behind perforated doors to provide colour contrast and acoustic performance

Project-specific patterns

Custom patterns may also be developed, subject to manufacturing requirements.

To specify a Geometric pattern for your project, provide:

Preferred pattern or custom design requirement
Indicative locker layouts
Preferred locker configuration
Preferred powdercoat finish
